Prep Blog Review: Emergency Energy

2015-10-03 07:09:22 By Brenda E. Walsh

What is you plan for the moment when the lights go out? And I don't mean your usual blackout... I mean THE Blackout, caused by an EMP and much harder to fix.

Well, that's what we often ask ourselves and try to find the best solutions for you and for us. We are always looking for answers and new experiences to share, so here are 4 new articles that might answer some of your questions.

"Full credit for this hack goes to our Georgia humidity, a

buddy of mine, and my fondness for fire.

Trading theory for action is the only way to prove for yourself if something you've read or watched will work in real-life. For instance, will dry mullein (Torch Plant) leaves ignite with a ferro rod. I tested the theory and found that they smolder when 3,000 degree sparks landed on their dry surface. Dry is a relative term in Georgia humidity."

2. A Candle Flame: Survival Heat x 3

"You will probably not freeze to death if a blizzard takes

out the power in your area this winter but with all the buzz about possible EMP (electromagnetic

pulse) attacks and massive solar flares the issue of weeks or months without power during winter needs to be addressed.

What can you do with a single candle flame, or better yet 3 or 4? You may have noticed that the room did not become noticeably warmer at Uncle Joe's 80th birthday party when all the candles were lit."

3. How to Pick the Best Firewood for Clean-Burning, Long-Lasting Fires

"It's officially fall, which means it's time to clean out the fireplace and inspect the chimney. It's also the ideal time to setup your firewood pile. Here's how to pick and prepare the best burning firewood.

The Drier the Better

A rule of thumb for firewood: The drier, the better. Wood consists of small tubes that deliver water from the roots into the trunk and branches of the tree."

4. Why You Need To Buy More Than One Flashlight

than one flashlight for your home or car. This may seem so silly, but it's not, let me explain.

Sometimes we may visualize a disaster happens when the sun is shining outside. Well, the truth is a disaster or unforeseen emergency can happen at any time of the day or night."
