

How To Prepare Your Vehicle For Survival

2015-12-06 07:57:33 By Survivopedia

In any bug out situation your life will depend on the vehicle you choose, as well as how you took care of it, and prepared it for the journey.

So it only makes sense to pay close attention to your bug out vehicle, and to learn as much as you can on how to keep it in best functioning condition, depending on the disaster you might be facing, the location you would be heading to and the route you take to get there.

We wrote about the [top 10 vehicles for your EMP survival](#) and the [top 10 bug out vehicles](#). We also found this cool infographic from [Toolorders](#) that packs a lot on information on this topic.

So take a look and make sure to let us know what's your bug out vehicle of choice, in the comments section below!

HOW TO PREPARE YOUR VEHICLE FOR SURVIVAL

THE ROAD AHEAD...

Surviving a long drive in a vehicle is a high-stress situation. The last thing you want is to get stuck in a traffic jam or a long line of cars, only to find out that the road ahead is blocked. This is why it's important to have a plan for what to do if you get stuck in a traffic jam or a long line of cars.

THE RIGHT VEHICLE

When it comes to choosing a vehicle for survival, there are a few things to consider. First, you want a vehicle that is reliable and has a good track record. Second, you want a vehicle that is easy to maintain and has a good spare parts availability. Third, you want a vehicle that is comfortable and has a good interior. Finally, you want a vehicle that is safe and has a good safety record.

IMPORTANT VEHICLE CHECKS

Before you take your vehicle on a long drive, there are a few important checks you should perform. These include checking the oil, the water, the tires, the brakes, and the lights. You should also check the battery and the alternator. If you are not sure about any of these checks, it's best to have a professional mechanic check them for you.

ESSENTIAL EQUIPMENT

When you are driving in a survival situation, there are a few essential pieces of equipment that you should have with you. These include a first aid kit, a fire extinguisher, a spare tire, a jack, a wrench, a screwdriver, a hammer, a flashlight, a radio, a map, and a compass. You should also have a spare set of clothes and a spare set of shoes.

PLANNING YOUR JOURNEY

Before you start your journey, you should plan your route carefully. You should know where you are going, how long it will take, and what you might encounter along the way. You should also have a backup plan in case you get stuck or have an emergency.

DRIVING ADVICE

When you are driving in a survival situation, there are a few things you should keep in mind. First, you should stay calm and focused. Second, you should drive slowly and carefully. Third, you should avoid taking shortcuts or taking risks. Finally, you should always have a plan for what to do in case of an emergency.

OTHER TOP TIPS

Here are a few other top tips for surviving a long drive in a vehicle:

- Don't drink and drive.** Drinking alcohol can impair your judgment and reaction time, which can be dangerous when you are driving in a survival situation.
- Take breaks.** Taking breaks can help you stay alert and focused. You should take a break every 2-3 hours, even if you don't feel tired.
- Stay hydrated.** Drinking water can help you stay hydrated and alert. You should drink water every 1-2 hours, even if you don't feel thirsty.
- Stay with your vehicle.** If you get stuck in a traffic jam or a long line of cars, it's best to stay with your vehicle. This is because you will be able to see what is going on around you and you will be able to take action if necessary.
- Stay calm.** Staying calm can help you think clearly and make good decisions. You should take deep breaths and try to relax, even if you are feeling stressed.

SO LONG & GOOD LUCK

We hope you found this guide helpful. Good luck on your journey!
