

Prep Blog Review: Survival And Bushcraft Habits

2015-01-10 07:31:59 By Brenda E. Walsh

As preppers we're always thinking of how to reuse, repurpose and DIY everyday stuff or things we don't use anymore. So this is what we're looking at today.

We found some really great reads that will surely give you some new ideas on say... what to do with your Christmas tree instead of tossing it as soon as the holidays are over, but other topics too. Let us know what you think about it and don't shy away from sharing your own ideas in the comments section below.

1. 5 Survival Uses for a Recycled Christmas Tree

"It's been said that a true survivalist can make something

useful out of anything. Let's put it to the test and see what we can come up with as practical uses for our crusty, dried-out Christmas trees.

1. Tinder

One of my favorite natural tinder materials in wet weather are the dry needles of evergreen trees. These have enough flammable pitch to burn even when they are damp. Once your Christmas tree needles are dry enough to fall off, they should be dry enough to use for tinder."

2. How To Split Logs Lengthwise Using Wedges

"This rough guide of How To Split Logs lengthwise using wedges to create lumber for building projects.

To split a log with wedges, take your axe in your left hand and a club in your right hand and, by hammering the head of your axe with the club, drive the blade into the small end of the log far enough to make a crack deep enough to hold the thin edge of your wedges. Make this crack all the way across the end of the log."

3. Making a Traditional Besom or Appalachian Broom

"Morning folks, I'm Dave Canterbury under camera with the pathfinder school and this high grass that you see surrounding me today is called broom sage. And hence the name, it was good for making brooms."

4. Fat Guys In The Woods: Blog Skills Series: Become a Fire Walker – Apache Match

"You've probably noticed that I'll often send the guys off on the morning of their solo day with some kind of fire carry method. The ability to carry fire is an important survival skill for a variety of reasons.

First, if you can carry fire, you don't have to recreate your fire start all over again. It typically takes less energy and calories to carry fire than to start all over from scratch. Survival is all about conserving calories."

5. 20 Survival Uses for Chap Stick

"When you're making a survival kit or a bug out bag, it's best to pack items that have multiple uses. This way you'll be prepared for all types of situations without taking up more space than necessary. There are dozens of versatile items, but today I want to talk about chap stick. Here are 20 survival uses for it:

1. Moisten chapped lips. Well, duh! But I had to include this lest someone leave a smartass comment chiding me for leaving it out. You know who you are."
