

Prep Blog Review: 10+ Ways To Use Plants

Do you know your plants? I consider myself to be pretty savvy when it comes to using them for prepping. However, articles such as one of [Theresa's latest](#) make me wonder what else I'm missing.

This week, I am proud to say I know some more edible plants, and I'm sharing my knowledge from the prepper community below.

I figured how to soothe poison ivy; how to use plants as medicine when SHTF and more. Please feel free to add more articles on this, if you find them valuable.

1. 12 Edible Plants In A Survival Situation

“There are many ways to forage for food in a survival situation. In a previous post I wrote about how you can eat bugs, insects, snakes and fishing to survive. Along with carrying food with you it is also valuable to know what types of food you can eat and which you should avoid. Getting sick is better than dying but if I had my preference I would prefer

to stay as healthy for as long as I could.”

2. 5 Natural Remedies to Soothe Poison Ivy Rashes

“If you spend any time outdoors, you know that poison ivy can grow just about anywhere and is the bane of all outdoor enthusiasts. 85% of the population has some sort of allergic reaction to poison. In all truthfulness, it is not the plant people are allergic to, but the oil in poison ivy, poison oak and sumac. All parts of the plant contain the oil, urushiol, which causes the bubbly, itchy rash. Once the oil makes contact with your skin through direct or indirect exposure (from clothing, shoes, or your pet), a rash can occur within 12 to 72 hours. Within that time, you will quickly regret that innocent brush with nature.”

3. How To Use Mulch In The Garden – The Secret To Weed Free Success!

“If you want to have less weeds, less maintenance, fewer headaches and more vegetables from your garden – then mulch in the garden is the answer! The list of benefits for utilizing mulch in the garden is long and powerful. It is a soil insulator, a moisture retainer and a weed suppressor. And when the right mulch is chosen – it has the added benefit of building incredible nutrients into your soil, leaving you with a more productive and healthy garden year after year.”

4. DIY Antibiotics: What To Grow to Protect Your Health in a Crisis

be unavailable.

Clearly, this means you **need to have to supplies on hand**, particularly for anyone who is dependent upon insulin or other medications that can be deadly if disrupted.

But those supplies will only go so far. Something that is also important to do is become **familiar with medicinal herbs and plants**, and grow some of the ones that could be most useful to your family or network.”

5. Foraging For Survival: Wild Plants You Didn't Know You Could Eat

“Every week, homeowners across North America spray their lawns with chemicals, killing plants that their grandparents and great-grandparents would have picked and eaten.

In fact, most homeowners likely don't even realize that those “pesky weeds” are actually edible – and far healthier for you than many items already in the refrigerator.”
