

[VIDEO] Transforming a Light Medium Tactical Vehicle into the Ultimate Bugout Overlander – Part 1

Tyler's here with a new project and we couldn't be more excited!

He's got his hands on an LMTV – a Light Medium Tactical Vehicle – that he's going to transform into the “ultimate SHTF overlander bug-out vehicle” over the course of a video series starting today.

In this first part, he focuses on getting the vehicle back from Texas to Utah, showing us some of the issues encountered along the way, including some loose oil lines and a MacGyvered parking brake. Stick around to the end to see Tyler taking the LMTV to the hills of Moab to test out its capabilities and be sure to check back for updates on his progress.
