

[VIDEO] Pocket Survival Kit (PSK) – Rescue Signal Options

On a moonless night, the human eye can barely distinguish shapes and everything is mostly a different shade of black, but they can also spot a lit candle from 30 miles away clearly. That's why it's important to carry a way to signal in your Pocket Survival Kit (PSK).

If you don't, you may wind up like in the stories you've often heard of people being found dead in areas where rescuers thought they searched everything. Cache Valley Prepper is back to teach you what you should pack in your PSK so that you don't end up a cautionary tale for other adventurers and survivalists.
