

Death Sentence For The 2nd Amendment

As most of us know by now, the 2nd Amendment is all that stands between freedom and all out totalitarianism. It is the backbone of all other freedoms and rights, in a world gone raving mad with domination over others. That's why the visionary Framers made it an absolutely unqualified, uncontrollable, 'Shall Not Be Infringed' for ANY reason, guaranteed individual right, period!

I saved this article for after the holidays so as not to depress anyone too much more than we already are with this out of control regime while we all were trying to enjoy what little we have left of their precious American Constitutional guarantee of life, liberty, and the pursuit of happiness. But something happened.

We all just heard on the news that ['he's' at it again](#) with despotic fiat attempts at circumventing the Constitution, like some king, or supreme theocratic ruler, or marxist dictator, or whatever he thinks he is.

This time it's his New Year's resolution finally getting his illegal private citizen background check (gun sale registration) for future confiscation scam going again, with a little salt in the wounds of Freedom by also making everyone on a No Fly List forbidden from having a gun, if he can sneak that in through the 'back door' of his administrative fiats.

Never mind that the No Fly List is also constitutionally illegal, literally throwing all Bill of Rights guarantees of due process right out the third floor window! And that so many people are on it who don't belong on it but have no recourse but to hire a lawyer spending months and years fighting it without any guarantee of getting off the list—including even a

few high ranking Government officials-that it amounts to nothing less than old fashioned Gestapo tricks to eliminate your 'opposition'?

The No Fly List (part two of the 'control all personal free movement' agenda along with part one, the illegal I.D. card requirement in the form of [the 2005 'Real I.D. Act'](#)) is a genuine abusive decree because the decisions about who gets on the list are done in secret by some hack State Dept bureaucrat based only on subjective determinations with NO clearly delineated legal criteria, other than a dubious belief of potential terrorist connections! Beat THAT, Adolph, Stalin, Mao, and the rest of you old boy JV team! ACLU, where the hell are YOU!

And as long as POTUS is getting away with all this albeit with much media consternation and question, he is still laughing and holding hands with the executioner all the way to the people's rights gallows. Only Rand Paul stood up to the task and recently introduced a Senate Bill to preclude such 'presidential' executive orders without Congressional approval anytime they are in conflict with Constitutional reference.

Unfortunately a case of too little too late. Fat chance it does any good now because of how long the procedure and final voting takes. Meanwhile the noose on the neck of the 2nd/A is tightening. They get away with it because our reps let them. And WE let our reps get away with letting Obama do it!

How Bad Is It?

It's worse than bad. The tipping point of tyranny has finally fallen over into the hands of the enemy camp. Totalitarian gun grabbers are now winning strongly. Free American patriots are losing miserably. This President and his anti-Constitutional 'think tank' must have been staying up long nights guzzling oceans of taxpayer funded black coffee to have a plan ready to seize upon current agenda advantageous circumstances.

Amazingly they've even somehow garnished enough funding for this De Facto background check gun registration decree to hire hundreds of new FBI and BATFE agents to facilitate and manage this latest criminal act against the people's privacy rights to own a gun while they cut back on Social Security benefits and still haven't adequately brought the VA up to much needed financial improvements for disabled combat vets!

What Triggered This Bold Attack by Obama on the 2nd/A?

{adinsert bph}Obama became tactically emboldened with new polls in the recent months including a Pew Poll report indicating that over half the population would agree to expanded background checks (aka gun registration) for private citizen sales if it helped reduce 'bad' people from getting guns. Which eventually includes the interpretation of 'bad' people and the attendant Fiat laws to potentially include almost each and every one of us who disagree with the regime.

This doesn't really mean that most people agree with anti-Constitutional gun control, it simply reflects that totalitarian mind control strategies have worked better than expected under this regime. And that far too many Americans have succumbed to the bait and switch and hook of the mythical nanny state comfort zone. Which is nothing less than falling victim to the most insidiously evil plot to eventually enslave [an entire nation of people ever devised by a modern government](#). The Great Gun Control Hoax!

In association with the regime's agenda, and while nobody seemed to care or pay attention to any level of statutory tyranny proliferation on the state levels, the totalitarian Cosa Nostra wasted no time during Obama's reign consolidating their forces in a pincer maneuver with New York in the East and California in the West— which on New Year's day put statewide background check registration into law including special police units to enforce compliance in house to house sweeps if necessary, already situated in designation!

And the disease is spreading as totalitarian billionaires are donating inexhaustible funds to ensure totalitarian legislatures get in at state levels to continue expanding anti-gun laws throughout the country replicating those New York and California.

At least 18 or more states now have similar laws, and the estimate is that if this agenda continues, over half the United States will have draconian anti-2nd/A laws by the year's end! And this doesn't include the many Federal level anti-2nd/A death blow bills currently waiting for nothing else but another totalitarian regime POTUS and Congress to be voted in power next year!

The Real Reason for the Treason

The POTUS, his regime, and their misled minions, actually have no confusion about this. They all know the stupidity of their vacuous arguments for gun control. They are fully aware that 'Shall Not Be Infringed' clearly means no gun control restrictions or laws whatsoever, of any kind.

They know that restrictions or bans on material items can never solve a problem that is fundamentally an aberration of the human behavior mechanism which manifests itself in harmful social actions. They know gun control has never and will never stop gun violence or criminals from getting weapons.

They know the 1934 NFA and 1968 GCA and all other [gun control efforts](#) are, and always were, anti-Constitutional. President Johnson rattlesnaked this law through while most people were still snoozing from trying to wake up from Viet Nam. This same law would never pass again today.

Every day more TOTALITARIANS are coming full blast out of the closet and are no longer even defending their 'rationale' for gun control with specious notions of good public safety intentions.

They actually will now admit they want to exercise absolute control over people with too much freedom on their hands, and too many guns in those hands. Especially when the sheeple population explosion gets too large for the 'controllers' to manage every time they need to be fleeced for necessary government profit margins. So they don't want their government backed paramilitary police to have to face angry people—particularly the 'Molon Labe' types— who have the idea that they really need their silly freedoms shouting 'Give Me Liberty, or Give Me Death' while holding millions of AR-15's!

So killing the Constitution is not even denied any more. The truth is that the totalitarians fully understand completely what it takes to facilitate a Marxist/Fascist agenda, which is a complete erasure of the 2nd/Amendment by any means possible. Which means spreading lies, and providing whatever public bribery they can facilitate for their minions—followed by the complete functional disarmament of the population to emasculate any future form of public protest, popular resistance, civil disobedience from becoming a formidable physical revolution against the regime.

Sadly, too many of '[We, The People](#)' still don't get that or believe it. Even though they slap us in the face with it every chance they get.

Any Hope for a Miracle from... God?

The tyrant in Hunger Games said profoundly that "hope is stronger than fear" when talking about oppressing the people. But he forgot to mention that hopes are easily crushed and bypassed in active physical movements, because as Einstein said, "nothing happens until something moves".

We can hope all we want. But that doesn't get things done to change anything. And it is the devout responsibility of each of us as American citizens to protect our precious liberties.

The sad irony is that that human nature in Americans always

causes them to default to try to then do a reverse 'back door' approach to the problem to counter the G's initiatory back door attack.

They'll say things like I'll just hide my stuff or hurry up and buy more of what I need privately before the mandate goes into effect, or get beer ballsy in their delusions of revolutions by saying Molan Labe as if it remained a viable solution. When all that does is make it easier to profile potential dissidents with [the latest government NSA spying expansion](#) (oh, you didn't know about that either?) so they wind up just buying more weapons for government storm troopers to confiscate when they come knocking.

Unfortunately we can no longer wait until the last minute. The new 'majority' of so called democratic Americans are turn coat Tories who welcome the totalitarian nanny state and will gladly succumb to the leftist agenda and vote according to their master's commands.

Remember, the original revolutionary patriots also amounted to less than the majority in America at that time. But we won our liberty and justice by getting off our asses and organizing and spreading the word. Part of that is spreading the 'serious' word to our Representatives who are our employees.

Let's do something this week by contacting our Reps and asking a simple question like "so...Ms./Mr. Representative, what are you going to do for a living after your term ends, if you let this regime get away with this illegal gun registration mandate?"

And then ask them "why hasn't anyone introduced a bill to repeal the 1034 NFA Act and the 68 GCA for starters? You didn't waste time getting a repeal going for the AHC act because the insurance lobbies were so nice to you? So let's get with it on the most important illegal law Repeal in our lifetimes. If you like that nice taxpayer provided office and

bennies from your Constituency?"

Otherwise, if the FBI folds to the power and influence of the current regime, and 'can't determine any indictable evidence' and Hillary is the candidate, and [the RINOs in the GOP](#) can't get their unification act together and totally support the outsider front runners, then it's over for our 2nd/A. No exchanges, no refunds.

I know Trump and Cruz vow to use their executive order power to delete all gun control measures as soon as they get their fingers on the POTUS White House Pen set. But that ain't in stone yet. Remember Romney? Nobody thought he could lose. Remember also that the House and Senate are also in the race, and like State G reps, the totalitarian billionaires are also funding the Leftist U.S. Reps.

The house only needs a dozen or so to shift the balance and the Senate only needs a net Democratic gain of 5 senators to end the life of all liberties, if Hillary is elected. ALL your guns that are now universal background check registered will also be subject to universal confiscations based on 'public safety' as 'administratively' determined necessary. This will be often and swift.

And the laughing leftist totalitarians will never look back.
