

VIDEO: How to Sharpen Your Knife with a Car Window

A sharp knife is a safe knife, and sometimes you just need to give the blade a quick touch up to keep that keen edge. However, we don't always have the equipment we need to keep our blades at their sharpest. In this video Tyler shows us how you can use the top of a car window to hone the edge of your blade.

Depending on the specific car window you're using you might have a higher or lower "grit", but regardless of that, if you use the technique Tyler demonstrates you'll have a sharper blade than what you started with.

**An easy, dirt-cheap way to withstand not just an EMP,
but any type of disaster**
