

VIDEO: A Quick and Easy Pole Barn for Shelter and Storage

The roof is on and the job is done!

In this video, we come back to Jason for the final part of his DIY Pole Barn build, putting up the purlins and the metal roof on his pole barn, as well as anchoring everything down and ironing out the kinks.

While he came up short with some metal for the roof, he showed us that pressing on and getting done takes only a bit of creativity and working with what you have, even if you don't have what you want.
