

VIDEO: Bug Out Power Solution with ALP Propane Generator

Tyler's search for the Ultimate Bug Out rig lead him to ALP Propane Generators. These lightweight and powerful units have lots of advantages over liquid fuel generations.

First off, there's no need to worry about spilling fuel or transport, it offers a neutral for a ground wire, and it's powerful enough to be used for a variety of devices. With 1,700 steady Watts, two AC outlets, and dual USB power ports, the ALPS generator can easily keep your electronics and equipment running.

This generator can run for 60-hours on a 20 lb at 25% load. We think these offer a huge advantage over many power options on the market when considering off-grid travel and emergency preparedness. Check out the video and let us know your thoughts in the comments!

World's Smallest Battery Powers House For 2 Days
