

VIDEO: DIY Painting a Shotgun for Camouflage and Protection

Camouflage works by breaking the outlines of recognizable objects, allowing them to blend in with their background. As firearms are some of the most easily recognizable objects in the world, it makes sense to apply camo to them, so Jason's here with a quick and easy video on how to do just that.

In this video, he covers the basic prep work to make sure you get the paint to stick to your gun, as well as some ideas for creative camouflage options to really blend in with your surroundings.

Just make sure you remember where you put it down after you're done.
